

The DLI meters have a spectral range of 400 to 700 nm PAR (DLI-400 and DLI-500) and 400 to 750 nm ePAR (DLI-600). The spectral responses of DLI-400, DLI-500, and DLI-600 can be seen in the graph above. Mean spectral

across a wavelength range of 300 to 800 nm in a monochromator with an
were normalized by the measured spectral output of the monochromator/
